Having completed the Library conversion to the East Wing of the Quadrangle, Winchester House School decided to convert the West Wing which was then underused and in need of refurbishment.

A new Art and CDT Department was identified as a key school need. The ground floor was designed to provide three linked spaces with glazed screens providing visual continuity through the suite of rooms. The staff of the new department played a key role in designing the facility to ensure the layout met their requirements and appropriate Health and Safety Guidelines.

The first floor attic spaces above the Art and CDT were designated as much needed space for staff. The facilities included a small flat, computer, resource area, staff room and wc's, cloakroom and shower room. The refurbished spaces are all well used.

The project was largely undertaken through a Summer vacation with minimum disruption to school life.
