Having successfully completed a refurbishment of the bedroom wing, Acanthus Clews were invited to prepare a comprehensive feasibility study to rationalise the existing buildings, improve the main health facilities and generally give Champneys a new lease of life.

Following the study, a £6.5m scheme was implemented which included a sensitively designed new building to cater for new restaurants, kitchen, female spa and staff accommodation. In addition major alterations were carried out to the main house with a complete reorganisation of the entrance and approach.

The result is a stylish and homogenous group of buildings around a landscaped entrance courtyard, approached by a new formal drive which creates a 'wow factor' for the sense of arrival. Internally the principle rooms have been refurbished to a high standard and include a completely new reception area and the creation of a new unisex spa under a glazed atrium roof.
